## RELEVANT EXPERIENCE

Tata Consultancy Services Limited, Atlanta, GA — November 2021- Present

Front-end Engineer — Humana Inc.

- Spearheaded and completed the migration of client applications from Angular to Next JS within three months, leading to significant improvements in application responsiveness and overall performance.
- Conducted meticulous testing and debugging throughout the migration, achieving a 25% reduction in system downtimes, ensuring a seamless transition for end users.
- Amplified sales by 10% through the strategic redesign and optimization of the transfer UI flow, cultivating a more efficient and impactful user experience.
- Transformed code architecture by deploying highly efficient and reusable React components, significantly reducing redundancy and elevating code maintainability to new standards.
- Elevated code quality and ensured consistency across the codebase through proactive participation in code reviews, delivering impactful feedback, and staunchly advocating best practices.

Full-Stack Engineer — Genuine Parts Company

- Cultivated collaborative relationships with project managers and cross-functional team members, fostering a synergistic working environment that substantially increased project efficiency and effectiveness.
- Collaborated with the principal engineer to construct comprehensive architecture diagrams, providing the business team with a lucid understanding of the overall application structure.
- Demonstrated the ability to independently learn and comprehend complex customer codebases through self-study, resulting in increased efficiency and accuracy in troubleshooting, modification, and enhancement of existing systems.
